-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 & 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Wu 6,176,758.

Wu shows a balloon inflation device including a first tube 13 having a first end for receiving air and a second end for receiving the mouth of a balloon; and a second tube 10 attached to the first tube, and having a collapsible portion to retain air in the balloon.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 9, & 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu in view of Penjuke 5,807,157.

Wu does not show a lighting device in the balloon. One would recognize that a lighting device would be desirable in the balloon to improve its decorative appearance. For example, Penjuke shows that a light device may be inserted into a balloon through the air inflation tube. It would have been obvious to one of ordinary skill in the art to include this lighting device in the balloon of Wu.

Claims 2-7, 10, 19, & 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-17 are allowed.

The prior art does not disclose a method for constructing a balloon, including inserting a tube assembly into the mouth of a balloon, the tube assembly having a first tube, and a second collapsible tube, such that the

second tube is inserted into the mouth, and the mouth seals against the tube assembly.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
